

# Provenance des Juifs déportés à partir de la France

## From where came the Jewish deportees from France

[Jean-Pierre Stroweis](#)

Les tableaux ci-dessous présentent la distribution géographique des lieux de naissances des personnes inscrites dans le Mémorial de la Déportation des Juifs de France en ligne. Le lieu de naissance de 75 718 personnes (95.5% des personnes) est maintenant (août 2021) identifié. C'est 2.5% de plus qu'en juin 2019 (73 591 lieux de naissance identifiés, soit 93%).

Cette distribution est effectuée soit par pays (Table 1), soit par pays et par région administrative (Table 2), selon les frontières de 2021. Cette population provient de 6 719 localités différentes réparties sur 75 pays, ce qui illustre sa grande diversité. Les plus gros contingents sont originaires de Pologne (23 774 personnes, 31.4%), de France (19 451 personnes, 25.7%), et d'Allemagne (9 284 personnes, 12.3%).

Pour obtenir une estimation de la répartition des lieux de naissance en fonction des frontières en vigueur en 1938, on pourra ajuster ces chiffres, en ajoutant ou soustrayant les données des provinces qui sont passées d'un état à un autre. Voir la Table 3 à ce sujet.

Les tables sont classées par ordre alphabétique du nom des pays en anglais.

The tables presented below show the geographic distribution of the birthplaces of the persons listed in the online Memorial of the Deportation of the Jews from France. As of June 2019, the place of birth of 75,718 persons has been identified, i.e., for 95.5% of the entire list. This is 2.5% more than in June 2019 (73,591 identified birthplaces).

This distribution is given either per country (Table 1) or per country and per their administrative regions (Table 2), according to the 2021 frontiers. This population comes from 6,719 distinct localities spread on 75 countries, expressing its wide diversity. The largest groups are from Poland (23,774 persons, 31.4%), France (19,451 persons, 25.7%) and Germany (9,284, 12.3%).

In order to obtain an estimate distribution of the birthplaces according to the pre-war frontiers, it is possible to adjust these figures, by adding or removing the numbers of the regions that switched from one state to another. This is done in Table 3 for a few countries.
